of the charger.

## ▲ Make sure that all safety facilities and connections are available, properly installed and undamaged at all times and are tested regularly to ensure they can operate normally. ▲ Make sure that the input voltage, frequency, circuit breakers and other conditions of the device meet the specifications before the device is powered on. It's important to observe the

▲ Before powering on the device, please confirm that the device is properly grounded to avoid

unnecessary accidents. If a ground fault occurs, it is assumed that the cable carries voltage.

▲This product should only be installed, repaired or maintained by authorized electricians and in accordance with national guidelines for electrical installations. All applicable local, regional

▲ Regularly check if the charger has visible damages. Do not use a damaged product.

and national regulations for electrical installations must be respected.

maximum permissible charging current of the connection.

power plug is still connected.

Note

service.

- Please make sure there is no high-voltage power in the system before inspecting the device. ▲ Please insulate the unnecessarily exposed metal parts of all tools to prevent them from touching the metal frame, which may cause short circuit.
- ▲ To ensure the service life and stable operation of the charging station, the operating environment should be kept as clean as possible with a relatively stable temperature and humidity. The charging station must not be used in flammable environment or environments with volatile gas.
- ▲ Please keep the power cord away from the heated surface. Please do not put the power cord in the gap of the closed door or pull it out of sharp edges or corners.
- ▲ Do not use the charger when the inside of the charging plug is wet. ▲ Do not modify, retrofit, or change any part by yourself under any circumstances.
- ▲ Please do not use this product as a toy. Pls. take good care of children to ensure that they will not play with this device as a toy nor put fingers into the charging connector when the
- ▲The circuit to which the charger is to be connected must be equipped with a residual current circuit breaker.
